

MICHAEL PRETTI

Founder · Technology Leader · Full-Stack Engineer

Waterloo, Ontario, Canada · [linkedin.com/in/mikepretti](#) · [service-zen.com](#) · [mpretti.github.io/resume](#)

SUMMARY

Technology leader and hands-on builder with 25+ years shipping production systems across startups, fintech, healthcare, and enterprise. Second engineering hire at Shopify Plus (helped scale the team to 200+). Patent holder. Founder of Service Zen — an AI-native platform for home service businesses — and experienced CTO / founding engineer across crypto, insurtech, and women’s health.

CORE SKILLS

Languages	TypeScript, JavaScript, Python, Java, Ruby, SQL, C/C++
Frontend	React, Vite, Tailwind CSS, React Native, Electron
Backend	Node.js / Express, Ruby on Rails, PostgreSQL, Supabase, Convex, Redis
Cloud & Infra	AWS, GCP, Terraform, Docker, Kubernetes, Cloudflare Workers, Vercel
AI & Product	Gemini, OpenAI, Anthropic, MCP servers, voice AI, agent tooling
Payments	Stripe, Stripe Connect, Fireblocks (crypto custody)

PROFESSIONAL EXPERIENCE

Founder & Technical Lead — Service Zen

2025 – Present

Waterloo, Ontario · [service-zen.com](#)

- Founded and built an end-to-end SaaS platform for home service businesses (CRM, jobs, quotes, invoices, scheduling, routing, payments, marketing, and analytics).
- Architected a hybrid stack — React/TypeScript SPA, Express API, Supabase (Postgres/Auth/Storage), Convex realtime sync, Stripe Connect payouts, and AI assistants (Gemini/OpenAI/Claude).
- Shipped production AI features: conversational business assistant, voice WebSocket bridges, website enrichment, and an authenticated MCP server so agents can operate the product programmatically.
- Built multi-surface hosting: Vercel SPA, DigitalOcean API droplet, Cloudflare Workers for public SP sites, Capacitor mobile, and OAuth integrations.

React · TypeScript · Vite · Node/Express · Supabase · Convex · Stripe Connect · Gemini/OpenAI · MCP · Cloudflare · Vercel

Founding Engineer — June Women’s Health

2024 – Present

Canada (remote)

- Architected React/TypeScript frontend with Supabase and PostgreSQL for a national women’s health platform.
- Integrated Full Script, Practice Better, and Pocket Pills for prescriptions, coordinated care, and medication management.
- Implemented AI-powered personalized engagement and health assistant features for patients across Canada.

React · TypeScript · Supabase · PostgreSQL · Healthcare API integrations

Chief Technology Officer — Life Design Analysis

Aug 2024 – Apr 2025

Waterloo, Ontario

- Led technology transformation for cloud-based life insurance sales software serving advisors, MGAs, and wealth firms.
- Delivered AI-powered workflow optimization that reduced processing time by ~40%; modernized legacy PHP with TypeScript services.
- Deployed AWS infrastructure with Terraform and integrated Microsoft BI for advanced reporting.

TypeScript · PHP · AWS · Terraform · Microsoft BI · AI integration

Staff Software Engineer — Newton.co

Mar 2021 – Jan 2022

Waterloo, Ontario

- Expanded crypto trading platform with 40+ new assets; implemented secure deposit/withdrawal via Fireblocks.
- Built cross-microservice logging/monitoring and improved KYC flows with Persona; grew and mentored engineers.

Python · Node.js · AWS · Terraform · React Native · Fireblocks · Persona

Chief Technology Officer — VendorPM

May 2020 – Nov 2020

Waterloo, Ontario

- Led core product for a 10,000+ vendor property-management marketplace; migrated MongoDB → PostgreSQL.
- Built vendor ranking algorithm; partnered with investors and executives on fundraising.

PostgreSQL · MongoDB · GraphQL · React

Owner / Quantitative Trader — Ground Floor Trading

2006 – 2020

Waterloo / Vancouver

- Built and operated a proprietary algorithmic trading firm for 14 years; managed multi-million-dollar portfolios.
- Developed exchange-connected trading systems and a strategy that generated \$2M+ in profits (ETF auction focus).

Java · Python · MATLAB · FIX Protocol · Real-time systems

Senior Software Engineer (Key Hire #2) — Shopify Plus

May 2015 – Aug 2017

Waterloo, Ontario

- Second key development hire for Shopify Plus; helped scale engineering from 2 to 200+ people.
- Built Amazon → Shopify migration tooling for Fortune 500 merchants; Instagram prospecting for Plus sales; Wholesale app and Electron desktop tooling.

Ruby on Rails · React · Electron · Kubernetes · GCP

Full Stack Developer — Coinvest

Dec 2017 – Apr 2018

- Built decentralized investment trading MVP; designed ERC-20 tokens and smart contracts (Solidity/Ethereum).

Software Manager — P&P Optica

Nov 2010 – Mar 2013

- Managed engineering for spectral analysis platform; co-invented patented spectrometer calibration technology; built Iris (Java/C++).

Earlier leadership & engineering — QuoteMedia, Credit Union Central of BC, IBM, and others

1999 – 2010

- Team lead / senior engineer roles spanning real-time market data, online banking web services, and Fortune 500 platforms (TD Waterhouse, British Airways, IBM Investor Relations).

EDUCATION

University of Waterloo — Bachelor of Mathematics, Joint Honours Computer Science and Combinatorics & Optimization

1994 –
1999

Maintained 80%+ average throughout the program

PATENT

US Patent 9,546,904 (Granted Jan 17, 2017) — “Apparatus and method for optimizing data capture and data correction for spectroscopic analysis”

Co-inventors: Olga Pawluczyk, Romuald Pawluczyk · patents.justia.com/inventor/michael-pretti
